

FEROZEN FORTE®

Advanced Iron Nutrition Platform

Product Overview

FEROZEN FORTE® is an Italian-developed bulk formulation platform based on microencapsulated iron technology.

Designed for nutraceutical manufacturers and brand owners, FEROZEN FORTE® combines high-quality iron delivery with excellent formulation flexibility, offering a ready-to-manufacture solution for adult iron supplementation products.

The formulation is intended for manufacturers seeking premium iron products with improved consumer acceptance, reduced metallic taste and scalable production opportunities.

Technology Platform

Active Ingredient

Microencapsulated Iron

Technology Benefits

- Improved ingredient stability
- Reduced metallic taste
- Enhanced formulation flexibility
- Suitable for multiple dosage forms
- Excellent blending performance
- Scalable manufacturing process

Product Positioning

FEROZEN FORTE® has been developed as a premium adult iron formulation platform suitable for modern nutraceutical markets.

Target Applications

- Iron deficiency support
- Low ferritin support
- Women's health
- Adult supplementation
- General wellness products

Key Benefits

- Microencapsulated iron technology
- Premium formulation concept
- Adult-focused dosage platform
- Pleasant sensory profile
- Bulk manufacturing compatibility
- Licensing opportunities available

Formulation Status

Current Version:

FEROZEN FORTE® – Development Version 1.0

Formulation specifications may be updated as part of ongoing product development and market adaptation.

Available Business Models

Bulk Formula Supply

Supply of ready-to-manufacture bulk formulations.

Formulation Package

Provision of proprietary formulation concepts and technical documentation.

Technology Transfer

Manufacturing guidance and formulation implementation support.

Brand Licensing

Licensing opportunities for selected territories and partners.

Private Label Development

Customized solutions for regional markets.

Manufacturing Concept

FEROZEN FORTE® is designed as a bulk formulation platform suitable for further processing by qualified nutraceutical manufacturers.

Potential applications include:

- Sachets
- Powder blends
- Stick packs
- Capsules
- Other nutraceutical dosage formats

Regulatory Position

Market-specific regulatory assessment remains the responsibility of the final manufacturer and distributor.

Product specifications may be adapted according to local regulatory requirements.
